

MMP100 | AUDIO PROJECT STATEMENT

Title: The calm in the park

Semester/Year: Spring 2020

Software: Audacity

I have used Audacity to depict a calming and aesthetic setting where the person listening to my piece is the protagonist riding a bike peacefully in the park filled with things existing in nature such as waterfalls, people and birds as one would see in a park, and he or she is doing so while listening to music as they are at peace in their own little world while in reality as well. I combined eleven audio samples. The most challenging part of the project was trying to make the audio samples transition smoothly after one another, and this took an immense amount of careful work using the envelope tool. In the end, I managed to pull it off, and I am actually proud of my final piece.
